Important:

It is important to use the **previous button** instead of the back button during credit card processing. This is very common when using internet payment systems. Complex processing is happening behind the scenes to ensure data encryption and the safety of your information. The **previous button** controls an interruption in processing correctly.

Auto-replenishment:

If desired, you can also set up an auto-replenishment function on your student account(s) for ala carte purchases. This feature will replenish the student account and apply the transaction to your credit card anytime the balance dips to a certain level. Full instructions and screen examples are available on the *"Auto-replenish Payments"* from the Lunch menu.
