

How to Install Windows Update

- Click in the “Type here to search box”, type “Check for updates”, and hit enter.

- Click “Check for updates”

Check for updates

- If you have a button that says “Install Now” click it to start downloading the update
- If you see “Optional quality update available” click “Download and install” (it may take a while for the update to download and install)

Optional quality update available

2021-03 Cumulative Update for Windows 10 Version 20H2 for x64-based Systems (KB5001567)

[Download and install](#) [View all optional updates](#)

- Once the status says “Pending restart” you can go ahead and click the “Restart now” button (it may take a few minutes for your computer to restart and finish applying the update)

Restart required

Your device will restart outside of active hours.

2021-03 Cumulative Update for Windows 10 Version 20H2 for x64-based Systems (KB5001567)

Status: Pending restart

Restart now
